BRUNSWICK NUCLEAR PLANT, UNIT NOS. 1 AND 2
DOCKET NOS. 50-325 & 50-324/LICENSE NOS. DPR-71 & DPR-62
PARTIAL WITHDRAWAL OF REQUEST FOR LICENSE AMENDMENTS
CONTROL ROD DRIVE AND CONTROL ROD DRIVE SCRAM ACCUMULATORS
(NRC TAC NOS. 85736 AND 85737)

Gentlemen:

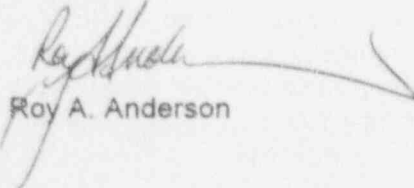

On January 25, 1993, Carolina Power & Light Company (CP&L), submitted a proposed amendment request for CP&L's Brunswick Steam Electric Plant, Units 1 and 2. The proposed amendment request consisted of two changes. Proposed Change 1 adds an exemption statement to the requirements of Technical Specification 3.0.4 in Specification 3.1.3.1, Action b. Proposed Change 2 revises Technical Specification 3.1.3.5 to address operation with more than one inoperable control rod drive (CRD) scram accumulator.

CP&L hereby withdraws that portion of the amendment request related to Proposed Change 2. CP&L is completing a study on conversion to Improved Standard Technical Specifications for the Brunswick Plant and believes that the revisions in Proposed Change 2 may be better addressed as a part of a conversion to the Improved Standard Technical Specifications. Proposed Change 1 of this license amendment request is not being withdrawn; therefore, CP&L requests NRC staff approval of Proposed Change 1.

Carolina Power & Light Company is providing, in accordance with 10 CFR 50.91(b), Mr. Dayne H. Brown of the State of North Carolina with a copy of this letter.

Please refer any questions regarding this submittal to Mr. R. P. Lopriore at (910) 457-2212.

Sincerely,

Roy A. Anderson
