Requalification Training Program

Re: University of Florida Training Reactor
Facility License: R-56; Docket No. 50-83

The current operator requalification and recertification program training cycle for the University of Florida Training Reactor as submitted with a letter dated May 28, 1993 is scheduled to end in June, 1995. Therefore, we propose to renew the current plan with no changes except for the new dates. In effect, the revised plan will be essentially the same as that currently being used for the two-year training cycle. A copy of this revised plan is enclosed for reference purposes. This renewed plan as included here will cover the UFTR operator requalification and recertification program from July, 1995 through June, 1997.

As usual, we propose to continue using this proposed program beyond the next two-year cycle; that is, we will automatically restart the same two-year requalification and recertification program training cycle every two years beginning in July, 1997.

If you need further information on this plan or the proposed usage of it for all future two-year training cycles, please let us know.

Sincerely,

William G. Vernetson
Director of Nuclear Facilities
