This is why I oppose the Indian point license transfer to holtec:

Holtec and SNC-Lavalin, the two companies behind the proposed Indian Point decommissioning contractors, are embroiled in numerous scandals and controversies that tell against their claims of high standards in ethics, compliance, financially sustainable business practices and trusted stewardship of nuclear materials. Their actual record is full of corruption, bribery, fraud, pleading guilty to and paying fines for malfeasance, getting barred from doing business with the TVA and the World Bank, and misleading and lying to officials and the public.
