Director of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

SUBJECT: Waterford SES Unit 3  
Docket No. 50-382  
FSAR Amendment 36

Dear Sir:

Please find enclosed 60 copies and 3 originals of Amendment 36 to the Waterford 3 FSAR.

The purpose of this amendment is to update those portions of the FSAR related to fire protection in order to reflect discussions regarding recent licensing activities on this subject. These activities include our March 26, 1984

submission of exceptions to Appendix R and the combined Appendix R/Fire Protection inspection conducted the week of April 9-13, 1984. This amendment consists primarily of miscellaneous changes resulting from resolution of Appendix R audit findings and exception requests. Many of the remaining enclosed changes are editorial in nature and as such do not affect NRC conclusions of safety.

In summary, those enclosed changes which are related to potential licensing issues have already been discussed at length with the cognizant NRC reviewer, thus we foresee no new issues arising from this submission.

Please note that according to our current schedule, we anticipate this to be the final FSAR Amendment prior to the post-OL update required by 10CFR50.71.

Yours very truly,

R. S. Leddick
