OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

May 10, 1984

Commissioner James K. Asselstine
U. S. Nuclear Regulatory Commission
17 & 17 H. St. N.W.
Washington, D.C. 20555
Mail Stop 1149

DOCKET NUMBER 50-445-0 L
PROD. & UTIL. REG. 50-446-0 L

Re: Comments on Site Visit to Comanche Peak (Docket Nos. 50-445 and 50-446
on May 3, 1984 by Commissioner Asselstine

Dear Commissioner Asselstine:

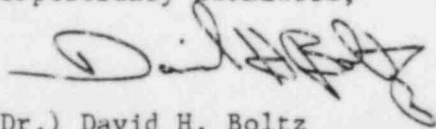

I would like to thank you for giving me the opportunity to comment in
writing on the site visit to Comanche Peak on May 3 which you, as well as
I and all parties in the operating licensing hearings for the plant, attended.

My only comment is that you should be aware not only of what you saw on the
tour, but what you did not see. For the most part, areas and items under
litigation in the hearings (e.g., pipe supports) were not on the agenda. In
addition, the diesel generators (which you did see) were not on the utility's
tour agenda, but were viewed only after you requested to see them.

I would hope that you would take this observation into consideration as you
and the other Commissioners make any decisions on Comanche Peak based either
in whole or in part on your assessment of this site visit.

I would appreciate your office supplying a copy of these comments to whoever
should receive one.

Respectfully submitted,

(Dr.) David H. Boltz
Boardmember
