Mr. Nunzio J. Pallidino, Chairman  
 Matomic Building  
 1717 H Street, N.W.  
 Washington, D.C.

Dear Mr. Pallidino:

Regarding your meeting between Consumers Power Co. and the N.R.C. held in April. There were representatives there that said they represented the Midland Community. They only represent themselves as the opposition. It would be great if your committee would inform the people that take the opposite view to Mary Sinclair - G.A.P. and Lone Tree Council and let us tell you our side of the story.

They keep stressing safety concerns - we are all concerned about safety. We are concerned about the economics - short & long term. I can't understand the lack of concern that closing this plant would have on the entire State - "jobs - there are 5,000 of them tied into this plant."

Mary Sinclair speaks for very, very few people in Midland.

Sincerely,

*Ben Lerner*
