ATTENTION: Document Control Desk

SUBJECT: Calvert Cliffs Nuclear Power Plant
Unit Nos. 1 & 2; Docket Nos. 50-317 & 50-318
Control Room Habitability - Thyroid Dose Analysis (TAC Nos. M86396; M86397)

As discussed recently with your Staff, our Control Room Thyroid Dose Analysis is expected to be submitted by July 31, 1996. This timeframe will allow coordination of the Individual Plant Examination of External Events (IPEEE) submittal, so that the IPEEE results may be considered in the final system design configuration, thereby ensuring that the most effective system configuration results.

Should you have further questions regarding this matter, we will be pleased to discuss them with you.

Very truly yours,

A handwritten signature in dark ink, appearing to read 'R. E. Denton', is written over a horizontal line. The signature is fluid and cursive.
