DUKE POWER

April 3, 1991

U.S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, DC 20555

Subject: Catawba Nuclear Station
Docket Nos. 50-413, 50-414
1990 FSAR Revision
10CFR 50.4 and 10CFR 50.71

Enclosed are one original and 10 copies of the 1990 Revision of the Catawba Nuclear Station FSAR.

The Catawba FSAR was converted into an electronic publishing format just prior to initiating the 1990 revision cycle. This "converted" FSAR is thus a complete reissue, containing revisions effective as of October 31, 1990. Please discard your copy of the old FSAR, or ensure that it is clearly marked as a superceded document.

The revision line indicator is a zero in the left hand margin corresponding to the 1990 update. These indicators will remain until they are superceded by subsequent indicators. Next year's revision line indicator will be the number "1".

Our goal is to reduce the costs associated with the maintenance of numerous copies of the Catawba FSAR by providing the FSAR in a electronic format.

Identification of changes made under the provisions of 10CFR 50.59 are being sent under separate cover.

Very truly yours,

M. S. Tuckman
