April 16, 1991

U. S. Nuclear Regulatory Commission
Washington, DC 20555

ATTENTION: Document Control Desk

SUBJECT: Calvert Cliffs Nuclear Power Plant
Unit Nos. 1 & 2; Docket Nos. 50-317 & 50-318
Pages for Request for Amendment

REFERENCE: (a) Letter to NRC Document control Desk from Mr. G. C. Creel
(BG&E), dated March 28, 1991, Request for Amendment

Gentlemen:

Reference (a) requested amendments that involve numerous editorial changes and administrative corrections to the Calvert Cliffs Unit 1 and Unit 2 Operating Licenses. This letter forwards pages for the Unit 1 and Unit 2 Licenses and Technical Specifications associated with Reference (a).

We intend to include all pages from the Licenses and Technical Specifications as final pages for issuance with the amendments. Therefore, all pages have been included here, including pages that have no changes on them.

These marked up pages are current up to and including Amendment No. 152 (dated February 25, 1991) for Unit 1, Amendment No. 132 (dated January 2, 1991) for Unit 2, and the correction to Amendments 149 and 130 (dated February 19, 1991). Amendments arriving between now and the time the final pages are prepared will be incorporated into those final pages.

The final pages that we provide for the issuance of the requested amendments will be word processed to provide greater compatibility with standard NRC and industry practices. As a result, items such as page numbers, spacing, etc. may differ slightly from the pages attached. It is our intention to engage an independent third party verifier to ensure the accuracy of the final pages.
