This letter is cover one customer and one subject only.

In view of our recent emphasis on reducing the probability of PORV operations I believe it will be very worthwhile to emphasize to the B&W site residents that we should be informed immediately of any situations involving PORV operations. Will you please take steps to assure prompt feedback to B&W Lynchburg, specifically Licensing and J. D. Carlton, regarding PORV operations.

JHT

KEN,

Dave Lee should also be informed of PORV operations since he is the support coordinator for PORV programs.
