Mr. Doan

Dear Mr. Doan:

Enclosed are nine copies of a revised design for a proposed change in the Saxton Technical Operations and Maintenance. This revision is in response to suggestions from the Air Staff and the original design Request No. 10. It also incorporates technical changes to the design and fabrication of the Supercritical Long Range Bomber.

Enclosed also are revised pages to update the Saxton Final Safeguards Report and General Manager Report for the Supercritical Technology Program.

Very truly yours,

W. H. Layman
W. H. Layman
