SUBJECT: Waterford SES Unit 3
Docket No. 50-382
Response to Generic Letter 83-28, Item 4.5.3
Reactor Trip System Reliability
(System Functional Testing)

REFERENCE: W3P83-3318 dated November 4, 1983

Dear Sir:

The subject Generic Letter, in Item 4.5.3, required a review of the existing Technical Specification intervals for on-line functional testing of the reactor trip system.

As noted in our initial referenced response to Generic Letter 83-28, LP&L is participating in a CE Owners Group evaluation of the functional test intervals for the reactor trip system. We expect to be able to submit the results of the evaluation by December 3, 1984.

Should you have any questions or comments in this matter, please contact Mike Meisner at (504) 363-8938.

Yours very truly,

K. W. Cook
