Emergency Plan Training for
Non-AP&L Personnel

Gentlemen:

Subsequent to an Emergency Planning inspection conducted during the week of October 31 thru November 4, 1984, Mr. Charles Hackney of your staff telephoned to ask for additional information concerning training for non-AP&L employees. The following response is provided.

Vendors and contractors who are granted unescorted access within the Protected Area receive training which is commensurate with their job assignments. As a minimum, they receive Security and Emergency Plan training, and, if their work requires access to a radiologically controlled area, the necessary Radiation Protection Indoctrination is also provided. The Emergency Plan training course addresses the responsibilities and actions of employees in emergency situations.

As stated in our August 30, 1983 letter (ØCANØ88316), starting February 1, 1984, all full-time ANO and non-ANO employees who are on site twelve (12) months or longer will be included in General Employee Training (GET) annual retraining. This retraining will include Emergency Plan training as described above. Additionally, Procedure 1063.21, "Emergency Response Training Program," will be revised to also require GET annual retraining for full-time, non-AP&L personnel. This will be done by February 1, 1984.

We believe that these actions adequately address the need for training of non-AP&L personnel regarding actions they should take in response to an emergency at Arkansas Nuclear One.
