DOCKET No. 50-267

SUBJECT: Fort St. Vrain Plant Protective
System Technical Specifications

REFERENCE: (1) P-80340, Lee to Miller,
dated October 1, 1980

(2) G-83255, Madsen to Lee,
dated July 11, 1983

(3) G-83409, Wagner to Johnson,
dated November 3, 1983

Dear Mr. Collins:

As a result of the meeting held October 27, 1983, between Public Service Company of Colorado (PSC) personnel and members of your staff, PSC has agreed to revise its previous application for amendment to the Fort St. Vrain Technical Specifications concerning Plant Protective System setpoints (Reference 1).

This letter confirms PSC's intention to incorporate the recommendations mutually agreed upon and outlined in Reference 3.

The October 1, 1980 application contained setpoint values derived using methodology similar to that addressed in ISA-SP67.04-1982. Although some additional factors are considered in the ISA standard, we do not anticipate any exigent changes in the PPS setpoint values.

A work specification for evaluation of the Fort St. Vrain Plant Protective System setpoints has been prepared for use in developing the amended Technical Specification instrument setpoint application. A copy of this specification is attached for your information.

-2-

Based on the scope of work outlined in the specification, PSC will complete this program and submit the revised Technical Specification Amendment application by January 31, 1985. If you have any questions concerning this matter, please call Mr. M. H. Holmes at (303) 571-8409.

Very truly yours,

Don Warembourg by Milt McBride
