

Mr. Ivan Selin
Nuclear Regulatory Commission
Washington, D.C. 20555

Mr. Selin;

There are several operations in nuclear power plant that require corrective action. Hope Creek is not interested in these corrective actions.

Due to security, these corrective actions will not be discussed in this letter.

The Professional Engineer's fee for these corrective actions are:

\$5,000 for each nuclear power plant for corrective action.

I do have the technology to operate a cooling tower circuit without the use of potassium dichromate and no algal.

This option costs \$50,000 for each plant.
\$5,000 down and \$2,000 / month.

Sincerely yours,
Clark Adams
