Robert C. Shinn, Jr.
Commissioner

April 5, 1995

U.S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, DC 20555

Gentlemen:

Subject: Oyster Creek Generating Station
Docket No. 50 - 219
Amendment to the Facility Operating License
Technical Specification Change Request 225

The subject request was submitted to the NRC by GPU Nuclear letter dated February 28, 1995. The request proposes to revise the Oyster Creek Technical Specifications to remove the administrative requirement that a review be performed by GPU Nuclear to determine the existence of an unreviewed safety question for proposed changes to the Technical Specifications and for violations of the Technical Specifications.

The New Jersey Department of Environmental Protection's Bureau of Nuclear Engineering (BNE) reviewed the request in accordance with the requirements of 10 CFR 50.91(b). We concur with GPU Nuclear's rationale that these unreviewed safety question reviews serve no value since these activities specifically require NRC review and approval. We have no other comments. If you have any questions, please contact Rich Pinney at (609) 987-2086 or Suren Singh at (609) 987-2039.

Sincerely,

Kent W. Tosch, Manager
