Director of Nuclear Reactor Regulation
Attention: Mr. B. J. Youngblood, Chief
Licensing Branch No. 1
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Youngblood:

Reference: (1) Fermi-2
NRC Docket No. 50-341

(2) Letter, W. H. Jens to B. J. Youngblood,
October 5, 1983, EF2-65626, "Defer Proof
and Review Technical Specifications

Subject: Issuance of Proof and Review Technical
Specifications

The referenced letter requested the NRC to defer issuance of the Proof and Review version of the Fermi-2 Technical Specifications until further notice. Edison is now requesting that the process leading to the issuance of the Proof and Review version of the Technical Specifications begin. We have available resources to support your effort and feel that the impact of obtaining additional test data will be minimal at this time. We appreciated your delaying the NRC effort until this late date just prior to the issuance of an Operating License.

Should you have any questions, please contact Mr. O. Keener Earle, (313) 586-4211.

Sincerely,

cc: Mr. D. Brinkman
Mr. P. M. Byron
Mr. M. D. Lynch
