Washington, DC 20555

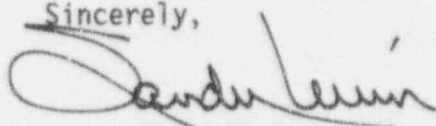

Gentlemen:

Subject: Oyster Creek Nuclear Generating Station (OCNGS)  
Operating License No. DPR-16  
Docket No. 50-219  
Severe Accident Management Guideline Implementation

As requested by Nuclear Energy Institute's (NEI) letter to utility contacts, dated December 22, 1994, and as reiterated in NRC letter to NEI, dated January 9, 1995, this letter is provided to confirm that OCNGS intends to enhance its emergency response capabilities by implementing Severe Accident Management Guidelines. OCNGS plans to evaluate information presently available on the severe accident issue, including NEI Report 91-04, Revision 1 "Severe Accident Issue Closure Guidelines," as well as insights from the OCNGS Probabilistic Risk Assessment to develop the Severe Accident Management Guidelines. OCNGS intends to complete the assessment of severe accident management capabilities pending final issuance of draft Boiling Water Reactor Owners' Group guidance, and implement any appropriate, cost-effective enhancements prior to December 31, 1998. Final scheduling will be in accordance with the OCNGS Long Range Plan Implementation Schedule.

If any additional information is needed, please contact David J. Distel, Senior Licensing Engineer at (201) 316-7955.

Sincerely,

  
for J. J. Barton
