Docket No. 50-366

HL-4833

U.S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, D.C. 20555

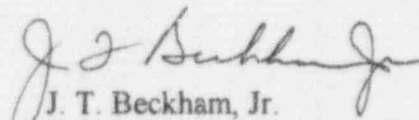

Edwin I. Hatch Nuclear Plant - Unit 2
Withdrawal of Technical Specification Revision Request

Gentlemen:

By letter dated March 14, 1995, GPC requested to temporarily revise the Technical Specifications. The revision added a note which would permit opening the drywell and wetwell purge valves with an inoperable drywell radiation monitor. Subsequent to this request Plant Hatch experienced a shutdown which allowed drywell entry and repair of the inoperable drywell radiation monitor. The repair of the monitor obviates the need for the temporary Technical Specification revision and we respectfully request that it be withdrawn.

If you have questions in this regard, please contact this office.

Sincerely,

J. T. Beckham, Jr.
