Gentlemen:

RE: WM. H. ZIMMER NUCLEAR POWER STATION - UNIT 1  
DRAFT INFORMATION NOTICE: REACTOR CONTROLS, INC.  
CONSTRUCTION DEFICIENCIES  
W.O. 57300, JOB E-5590, FILE NO. 956C,

CG&E has received your letter dated October 17, 1983 concerning work performed by Reactor Controls, Inc. at the Zimmer Station. In early November, during a conversation with Mr. W. L. Forney and Mr. T. P. Gwynn of your staff, it was agreed that an additional two weeks would be necessary in order to prepare our response to this letter. Since that time it has become apparent that an extensive evaluation, including the physical walkdown of selected systems, will be required in order to adequately prepare our response. We therefore request an additional sixty days in order to accomplish our review.

Should you have any questions regarding this matter or require additional information please feel free to contact me.

Very truly yours,

THE CINCINNATI GAS & ELECTRIC COMPANY
