Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: LaSalle County Station Units 1 and 2
Differences Between LaSalle County
Station Unit 1 and Unit 2 Technical
Specifications
NRC Docket Nos. 50-373 and 50-374

Reference (a): C. W. Schroeder letter to H. R. Denton
dated January 13, 1984.

Dear Mr. Denton:

The differences between the two LaSalle County Tech Specs which were not due to changes in the plant design, were submitted in Reference (a). These changes reflect CECO requested improvements, changes based on revisions to the STS, generic letters, NRR requirements or suggestions, and grammatical corrections.

The differences between the two Tech specs do not affect the adequacy of the current Unit 1 Tech Spec. These Tech Spec changes were reviewed and approved as part of the licensing process for Unit 2. Operation of Unit 1 and Unit 2 is not affected with these differences in place and safe plant operation or the health and safety of the public is not affected.

These differences are widely known within the station and licensed plant personnel have been trained on the differences during the early part of 1984. All cognizant department heads were also notified of the differences between the Unit's Tech Spec.

If there are any further questions regarding this matter, please contact this office.

Very truly yours,

CW Schroeder 3/21/84

C. W. Schroeder
Nuclear Licensing Administrator
