March 16, 1984
RBG- 17,307
File No. G9.5

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Denton:

River Bend Station-Unit 1
Docket No. 50-458

The River Bend Nuclear Group (RBNG) of Gulf States Utilities Company (GSU) has recently undergone a minor reorganization that effective March 1, 1984 has the Plant Manager reporting directly to the Vice President-RBNG and creates the new position of Vice President-Administration replacing the Vice President-Nuclear Operations. The position of Vice President-Administration has been created to add the proper emphasis at this time to the tasks of Training, Security, Procedural Administration, and Environmental Monitoring. At the time of fuel load, the Emergency Planning, Procurement, and Accounting activities will also become the responsibility of the Vice President-Administration. In addition, the Technical Staff located at site will now report directly to the Assistant Plant Manager-Services who will assume all the duties and responsibilities previously held by the Technical Supervisor.

These changes to the organization are shown on the attached organization charts and will be supplied to the Staff in form of Final Safety Analysis Report (FSAR) text revisions in a future submittal and future FSAR amendment.

Sincerely,

William J. Reed
for J. E. Booker
Manager-Engineering
Nuclear Fuels & Licensing
River Bend Nuclear Group
