LEAGUE AGAINST NUCLEAR DANGERS

Rt 5, Box 176 Stevens Point, Wis 54481

March 28, 1975

Edison G. Case
Deputy Director
Directorate of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Case:

In correspondence to you dated March 11, 1975: Docket No. 50-266 -
Corrections to License Event Report No. 50-266/75-4 - "E" Steam Generator
Tube Failure - Point Beach Nuclear Plant, from Sol Burstein, Executive
Vice President, Wisconsin Electric Power Co., reference is made to a
"letter of March 8 ... report concerning details of steam generator tube
failure which occurred February 26."

Although the correspondence of March 11 is in the Public Document Room,
UW-Stevens Point, the referenced letter of March 8, 1975 detailing the
incident has apparently not arrived.

We would appreciate receipt of the March 8 document as soon as possible.

Sincerely yours,

Gertrude Dixon

Chairperson for Research

League Against Nuclear Dangers (LAND)
