Dr. Thomas E. Murley  
Regional Administrator  
U. S. Nuclear Regulatory Commission  
Region I  
631 Park Avenue  
King of Prussia, Pennsylvania 19406

SUBJECT: I.E. Bulletin Number 83-07: Apparently Fraudulent  
Products Sold By Ray Miller, Incorporated  
R. E. Ginna Nuclear Power Plant  
Docket Number 50-244

Dear Dr. Murley:

A comprehensive review of the procurement activities for Ginna Station during the 1975-1979 time frame has been recently completed. We have found that Rochester Gas and Electric Corp. has never purchased any materials directly from Ray Miller, Inc. Additionally, RG&E has never installed or received equipment from other suppliers which contain materials provided by Ray Miller, Inc.

Plans are currently being formulated for providing further assurance of the adequacy of purchased materials. When implemented, samples of received materials will be periodically tested to detect major variations in specified material properties. Measures for testing pressure-retaining materials expect to be implemented by the end of 1984 with structural materials to follow in 1985. These measures which will enhance our existing quality assurance program controls for supplier evaluation, supplier auditing and receiving inspection will assure that materials used at Ginna are suitable for installation and use.

Very truly yours,

Roger W. Kober  
Vice President  
Electric and Steam Production
