Subject: Virgil C. Summer Nuclear Station  
Docket No. 50/395  
Operating License No. NPF-12  
NRC Generic Letter No. 83-37

Dear Mr. Denton:

By letter dated January 18, 1984, South Carolina Electric and Gas Company (SCE&G) responded to NRC Generic Letter No. 83-37, "NUREG-0737 Technical Specifications." In reviewing this response SCE&G discovered that a portion of the Combustible Gas Control Technical Specification Surveillance Requirement (4.6.5.1) was inadvertently omitted. Attachment I, which was transmitted as part of our original response to Generic Letter 83-37 dated January 18, 1984, has been revised to incorporate the omitted portion of the surveillance requirement.

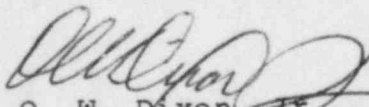

SCE&G has determined that a finding of no significant hazards consideration is appropriate in that the proposed change is within the scope of approved Staff guidance as delineated in Generic Letter 83-37.

This revision has been reviewed and approved by our Plant Safety Review Committee (PSRC) and the Nuclear Safety Review Committee (NSRC). A check in the amount of Four Thousand Dollars (\$4000.00) was previously submitted in our letter dated January 18, 1984.

Should you have any questions, please contact us at your convenience.

Very truly yours,
