Re: Docket No. STN 50-482

Ref: Letter KMLNRC 84-007 dated 1/19/84 from
GLKoester, KG&E, to JEGagliardo, NRC

Subj: Withdrawal of Potential 10CFR50.55(e) -
Positive Displacement Charging Pump
Pulsation Dampeners

Dear Mr. Gagliardo:

On December 22, 1983, Kansas Gas and Electric Company (KG&E) reported a potential 10CFR50.55(e) matter concerning the pulsation dampeners for the positive displacement charging pump. Additional information was subsequently provided in the Reference.

The evaluation of the matter described in the Reference has now been completed. KG&E has determined that the existing conditions would not have adversely affected safety of operations had they gone uncorrected. Therefore, KG&E has concluded that this matter is not reportable pursuant to 10CFR50.55(e).

Please contact me or Mr. Otto Maynard of my staff if you have any questions concerning this subject.

Yours very truly,

GLK:bb
