EA-19-097

Mr. Peter Dietrich
Chief Nuclear Officer
DTE Energy Company
Fermi 2 – 260 TAC
6400 North Dixie Highway
Newport, MI 48166

SUBJECT: REVISION TO CONFIRMATORY ACTION LETTER—FERMI POWER PLANT,
UNIT 2 COMMITMENT TO ADDRESS DEGRADED TORUS COATINGS

Dear Mr. Dietrich:

On October 4, 2019, the U.S. Nuclear Regulatory Commission (NRC) issued Confirmatory Action Letter EA-19-097 confirming DTE Energy Company's commitment to mitigate the degraded torus coating at Fermi 2 (Agencywide Documents Access and Management System (ADAMS) Accession Number ML19280D881). The Confirmatory Action Letter was issued based upon information reviewed as part of a 2019 NRC Design Basis Assurance Inspection (ML19211B289) and an NRC Special Inspection (ML20031D253). Specifically, DTE Energy Company committed to complete the following action:

- DTE commits to mitigate the degraded coating in the submerged portion of the torus by removing all coating in the submerged portion of the torus, including torus internals, and applying a qualified coating capable of withstanding design basis accident conditions.

On March 13, 2020, the NRC received a letter from DTE Energy Company notifying the NRC Region 3 Administrator of a change to DTE's commitment and providing clarifying information supporting the commitment change (ML20073N414). Based upon DTE Energy Company's March 13, 2020 letter, DTE Energy Company revised their commitment and documented their plans to complete the following action:

- DTE commits to mitigate the degraded coating in the submerged portion of the torus by removing all coating in the submerged portion of the torus and applying a qualified coating capable of withstanding design basis accident conditions. Removal of coating and application of qualified coating will also be performed for torus internals in the submerged portion of the torus with the exception of the internal surfaces of the downcomers and the internal surfaces of process piping. The internal surfaces of the submerged portion of the downcomers and the coated internal surfaces of the submerged portion of process piping will be inspected and degraded coating, if any, will be removed during the next refueling outage. This DTE commitment will be completed prior to resuming power operation following the next refueling outage; the next refueling outage will begin no later than April 30, 2020.

Pursuant to Section 182 of the Atomic Energy Act, 42 U.S.C. 2232, you are required to:

1. Notify me immediately, in writing, if your understanding differs from that set forth above;
2. Notify me, in writing, if for any reason you cannot complete the actions within the specified schedule and advise me, in writing, of your modified schedule in advance of the change;
3. Notify me, in writing, if for any reason you intend to change, deviate from or not complete any of the documented commitments set forth above, and advise me, in writing, of the changes or deviations; and
4. Notify me, in writing, when you have completed the actions addressed in this Confirmatory Action Letter.

Issuance of this Confirmatory Action Letter does not modify or amend the DTE Fermi Nuclear Power Plant license and does not preclude issuance of an Order making the above commitments legally binding requirements or requiring other actions on the part of the licensee. In addition, the NRC is not precluded from taking enforcement action for violations of NRC requirements that may have prompted the issuance of this letter.

In accordance with Title 10 of the *Code of Federal Regulations* 2.390, "Public Inspections, Exemptions, Requests for Withholding," of the NRC's "Rules of Practice and Procedure," a copy of this letter and your response will be made available electronically for public inspection in the NRC Public Document Room or in the NRC's ADAMS. ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>. To the extent possible, your response should not include any personal privacy, proprietary, security-related or safeguards information, so that it can be made available to the Public without redaction. If personal privacy or proprietary information is necessary to provide an acceptable response, then please provide a bracketed copy of your response that identifies the information that should be protected and a redacted copy of your response that deletes such information. If you request withholding of such material, you must specifically identify the portions of your response that you seek to have withheld and provide in detail the bases for your claim of withholding (e.g., explain why the disclosure of information will create an unwarranted invasion of personal privacy or provide the information required by Title 10 of the *Code of Federal Regulations* 2.390(b) to support a request for withholding confidential commercial or financial information).

If you have any questions concerning this matter, please contact Karla Stoedter of my staff. Ms. Stoedter can be reached at 630-829-9731.

Sincerely,

/RA by John Giessner Acting for/

Darrell Roberts
