Re: McGuire Nuclear Station, Units 1 and 2
Docket Nos. 50-369 and 50-370
IWP/IWV Pump and Valve Inservice Testing Program Revision

Dear Mr. Denton:

Pursuant to 10 CFR 50.55a(g), enclosed for NRC staff use and review are ten copies of Unit 1 Revision 6 and Unit 2 Revision 2 (both dated March 16, 1984) to the McGuire Nuclear Station pump and valve inservice testing program. These revisions correct errors in the current revisions and reflect changes in the testing requirements. These should be incorporated into your Unit 1 and 2 pump and valve inservice testing manual, removing any earlier version pages of the program. Should there be any questions concerning the basis for any of the changes, please advise.

Duke Power Company intends to implement the Unit 1 and 2 program as revised on an interim basis pending approval by the NRC.

By copy of this letter, one copy of the above documents are also being provided to NRC-Region II.

Very truly yours,

H. B. Tucker / *HT*
Hal B. Tucker
