Mr. Dennis M. Crutchfield, Chief  
Operating Reactors Branch #5  
Division of Licensing  
U.S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Crutchfield:

Subject: Oyster Creek Nuclear Generating Station  
Docket No. 50-219  
Technical Specification Change Request No. 88

As requested by Mr. J. Lombardo, of your staff, this letter formally transmits the Technical Specification pages which are related to the grid undervoltage protection portion of the subject change request. The attached Technical Specification pages provide a complete package of the revised pages which are applicable to the undervoltage protection system. These attached pages should replace the previously submitted pages and should be incorporated into the license Amendment applicable to this change request.

Please be advised that these pages differ from those submitted on or before February 9, 1984 because of Amendment No. 71 which was recently issued and a typographical error which appeared on p. 2.3-3. This error has been corrected to show the tolerance of the voltage relay as  $\pm 1\%$  and the tolerance of the timing relay as  $\pm 10\%$  for the degraded voltage condition.
