ENGINEERING AND RESEARCH

MAR 22 1984

Dr. Thomas E. Murley, Director  
United States Nuclear Regulatory Commission  
Office of Inspection and Enforcement, Region I  
631 Park Avenue  
King of Prussia, PA 19406

Subject: USNRC Bulletin dated July 22, 1983  
IE Bulletin 83-07  
Apparently Fraudulent Products  
Sold by Ray Miller, Inc.  
Limerick Generating Station - Units 1 & 2

File: Government 1-1 (IE Bulletin No./83-07)

Dear Dr. Murley:

The following is our response to NRC IE Bulletin 83-07 concerning apparently fraudulent products sold by Ray Miller, Inc. To provide the basis for our response Bechtel Power Corporation reviewed 455 vendors who provided material to various Bechtel nuclear projects. The review identified 36 vendors for Limerick Generating Station as potential sources of Ray Miller, Inc. products. A listing of these vendors is presented in the Attachment to this letter.

Further investigation of the equipment and/or materials furnished by these 36 vendors concludes that no Ray Miller, Inc. products are used at Limerick Generating Station.

Additional investigations into the possible use of Ray Miller, Inc. products were conducted by General Electric Co. NEBO (nuclear steam supply system), Philadelphia Electric Co. Purchasing Department, and Philadelphia Electric Co. Stores Division. None of these investigations has revealed any instance of use of Ray Miller, Inc. products at Limerick Generating Station.

IE 27  
11

We, therefore, conclude that no products sold by Ray Miller, Inc. are used at Limerick Generating Station. This statement completes our response to NRC IE Bulletin 83-07.

Sincerely,

  
Vice President  
Engineering and Research Department
