

Docket No. 50-346

License No. NPF-3

Serial No. 1035

March 15, 1984

RICHARD P. CROUSE
Vice President
Nuclear
14191 259-5221

Director of Nuclear Reactor Regulation
Attention: Mr. John F. Stoltz
Operating Reactor Branch No. 4
Division of Operating Reactors
United States Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Stolz:

Under separate cover, we are transmitting three (3) original and forty (40) conformed copies of an application for Amendment to Facility Operating License NPF-3 for the Davis-Besse Nuclear Power Station Unit 1.

This application requests that the Davis-Besse Nuclear Power Station Unit 1 Technical Specifications, Appendix A, be revised to reflect the changes attached. The proposed changes are to the Radiological Effluent Technical Specifications (RETS), Revised Offsite Dose Calculation Manual, and Process Control Manual.

The attachment identifies the proposed change, its Safety Evaluation, and its significant hazard considerations for the RETS. This revised submittal of the RETS resulted from the NRC review of discussion between the staff and Toledo Edison. This request also includes all previous revisions providing one complete submittal of RETS.

This amendment request is a revision to a previous submittal. Therefore, no fee is incurred.

Very truly yours,

R P Crouse / tom
