799 Roosevelt Road
Glen Ellyn, IL 60137

MIDLAND ENERGY CENTER PROJECT
DOCKET NOS 50-329 AND 50-330
POTENTIAL 50.55(e) REPORT CONCERNING
PROCURED ELECTRICAL EQUIPMENT
FILE: 0.4.9.72 SERIAL: 28073

References: J W Cook letters to J G Keppler, Same Subject

- (1) Serial 19130, dated December 30, 1982
- (2) Serial 20716, dated February 25, 1983
- (3) Serial 22197, dated May 13, 1983
- (4) Serial 22241, dated June 29, 1983
- (5) Serial 23769, dated August 12, 1983
- (6) Serial 23809, dated September 30, 1983
- (7) Serial 26644, dated December 23, 1983

This letter, as were the referenced letters, is an interim report on a 10CFR50.55(e) condition concerning delivered, safety-related electrical equipment not meeting project requirements.

Site overinspection activity continues on those safety-related purchase orders for which equipment has been received at the jobsite. At this time, overinspection activity has been completed on five of the sixty-six purchase orders identified, with substantial completion on the remaining sixty-one purchase orders.

In addition, MPQAD continues to participate in final source inspection activities where safety-related equipment still is being shipped. Shipments are taking place against six purchase orders.

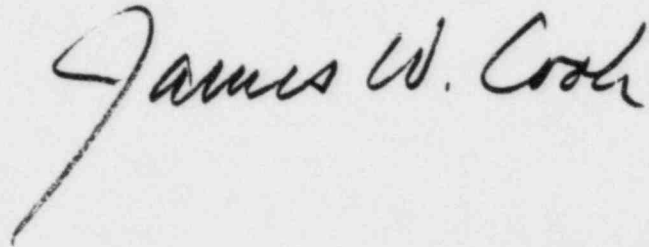

No safety concerns have been identified as a result of inspection activity or engineering reviews resulting from this 10CFR50.55(e) issue. However, a final decision about reportability will be withheld until inspection activities have been completed and until concerns about pull tests on crimped terminations have been resolved.
