Re: Catawba Nuclear Station
Units 1 and 2
Docket Nos. 50-413 and 50-414

Dear Mr. O'Reilly:

In my letter of February 1, 1984 concerning replacement of undersized motor operators for Westinghouse valves (Significant Deficiency Report No. SD 413-414/82-09) it was stated that work would be completed for Unit 1 and Unit 2 by April 1, 1984. Due to the extension of ESF testing, which involves two remaining valves on Unit 1, the expected completion date for this deficiency will be April 16, 1984.

Very truly yours,

Hal B. Tucker
