DOCKETING
PROC. & SERV. BRANCH
50-445
50-446

Dear Mr. Pigott:

Subject: In the matter of
Texas Utilities Electric Company,
et al (Comanche Peak Steam Electric
Station, Units 1 and 2)
Docket Nos. 50-445-1 and 50-446-1

Outstanding Document Requests

With further reference to your April 4, 1984, letter regarding outstanding document requests, we have reviewed our records and find that there are a few items which either need clarification or which were not shown on your list. We have marked those items with ** on the attached list. (The items which are unmarked are also shown on your list.)

I will be discussing the outstanding documents further with Messrs. Walsh and Doyle this week-end, and will get back in touch with you right away if there are any differences identified during those conversations.

Just to be certain we're on the same wave length, we want to clarify that this list does not include:

Items for which information has not yet been supplied (for instance, Doyle #1 and Doyle #7).

Items which Cygna is changing, reanalyzing, etc.

For all those items, we will of course want full documentation and calculations.

We also note that there are still many outstanding questions which have not yet been answered, and we of course still would like answers to those questions.

We also want to point out that, when Messrs. Walsh and Doyle are conducting their cross-examination, they do not necessarily intend to follow the format Cygna has used in responding to our questions (i.e., Doyle #1, Doyle

2503

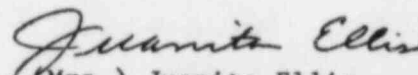

#2, etc.). They expect to continue the cross-examination as Mr. Doyle had begun it, support by support. (Should the same problem exist with more than one support, we will attempt to reach a stipulation with you, hopefully in advance of the hearings, that this is the case. Judge Bloch has indicated that he would not want us to repeat the same cross-examination questions for each support.)

One other request we have is that you send two copies of Cygna's revised testimony which we understand we are to receive on 4/13/84 (just as we are sending copies to both you and Ms. Williams) so that there will be no delay in our sending a copy on to Mr. Doyle.

If you have any questions about any of this, please let me know.

Sincerely,

CASE (Citizens Association for Sound
Energy)

(Mrs.) Juanita Ellis
President

Attachment

cc: Service List -- Docket Nos. 50-445-1 and 50-446-1

Documents Outstanding 4/7/84:

Walsh #1 --- Letter, Applicants and ASME Code Committee; and calculations
(Requested 4/3/84 conference call.)

Walsh #2 --- Documentation; where in Hilti manual for bolt spacing?
(Requested 4/3/84 conference call.)

Walsh #3 --- Cygna response: B&R isometric used in Enclosure D4-1 (see
Doyle 34) (the drawing Cygna utilized during the IAP and
latest revision).
(Requested 3/21/84 letter.)

Walsh #5 --- W5-1 and W5-2 (G&H calcs, Cygna will obtain from Applicants).
(Requested 3/21/84 letter.)

***CASE Exhibit 890 (a): want analysis and other methods of
approach (G&H calcs), vertical direction, that show don't
have to consider SSE condition.
(Requested 4/3/84 conference call.)

***CASE Exhibit 890 (b): interpretative information (including
justification for the 4%).
(Requested 4/3/84 conference call.)

G&H calcs: SCS 113 C, set 3
SCS 101 C, set 5
SCS 146 C, set 4, sheet 21
(Requested 3/21/84 letter; 4/3/84 conference call.)

Walsh #6 --- CASE Exhibit 933 (formerly 896): drawing and calcs for
RH-1-010-004-S22K.
(Requested 4/3/84 conference call. Cygna to request from
Applicants. Note: In checking over our files, we find that
we had not made our 2/2/84 document request to Applicants
clear on this one; see item 33 on request list, for PS-23.)

Walsh #8 --- (See also Walsh #12.)
***Math model and computer print-outs relied upon for Walsh #8
and Walsh #12. (Requested 3/15/84 letter; believe this has
already been supplied; I will double-check with Mr. Walsh
this week-end. Unless we advise to the contrary, please
delete this one from your list.)

Basis and source documentation for 5/3.
(Requested 4/3/84 conference call.)

Walsh #11 --- ***CASE Exhibit 939: Drawing, calcs, and pipe stress analysis
for RH-1-010-003-S22R.
(Requested 4/3/84 conference call. Cygna to request from
Applicants. Note: In checking over our files, we find that
we had not made our 2/2/84 document request to Applicants

Walsh #11 (continued):

clear on this one; see item 28 on request list, for PS-05.)

Doyle #4 --- **Documentation from which Cygna's answer was derived.
(Requested 3/29/84. We don't show that we have received this one.)

Doyle #8 --- Drawing of rear bracket in question, which indicates the
1-1/4" radius.
(Requested 3/29/84.)

Doyle #15 -- **Math model used, and input and output for finite analysis.
(Requested 3/29/84; not sure from notes whether we made it clear that we also want output; obviously, we do.)

**Cygna was to check to see if they have given us all of
analysis now on CASE Exhibits 898 and 900 (particularly
regarding welds and anchor bolts).
(Requested 3/27/84 conference call.)

**CASE Exhibit 892 (incorrectly formerly 899): Cygna is to
replace with analysis of CASE Exhibit 892, particularly at
weld at baseplate.
(Requested 3/27/84 conference call.)

Doyle #18 -- Tables 1 and 2; sources, references, documents for Enclosure
D18-1.
(Requested 3/13/84 letter; and 3/29/84 letter.)
