Docket Nos. 50-348
50-364

Director, Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Attention: Mr. S. A. Varga

Joseph M. Farley Nuclear Plant - Units 1 and 2
Control Room Design Review (CRDR) Program Plan

Gentlemen:

In accordance with the provisions of Supplement 1 to NUREG-0737, Alabama Power Company submitted a Program Plan by letter dated October 31, 1983 for conducting a CRDR for the Joseph M. Farley Nuclear Plant, Units 1 and 2. By letter dated March 9, 1984, the NRC Staff transmitted comments on this Program Plan to Alabama Power Company and recommended that a meeting be held during March or April of 1984.

Alabama Power Company has reviewed the NRC Staff comments and has determined that the recommended meeting would not prove meaningful at this time. This determination is based on the INPO NUTAC documents for CRDR not having been reviewed by the NRC Staff. The INPO NUTAC documents form the basis for Alabama Power Company's Program Plan and will be used to support CRDR activities. Alabama Power Company believes that NRC Staff review of the INPO NUTAC documents is essential prior to further discussion on the Program Plan. To support this review the INPO NUTAC documents are herein enclosed as a supplement to our letter dated October 31, 1983.

Alabama Power Company is committed to conduct a complete and effective CRDR and desires to meet, if appropriate, for further discussion on the Program Plan following NRC Staff review of the INPO NUTAC documents.
