Changes to FSAR Chapter 17.0

KMLNRC 84-004 dated 1/13/84 transmitted to the NRC changes to the Wolf Creek Operating Quality Program described in FSAR Section 17.2. Further changes are included in the enclosed Revision 12 of the FSAR. These additional changes are summarized as follows:

1. Organizational Changes
 - a. The Quality Division has been renamed the Quality Branch. This change appears throughout the section.
 - b. The Director Nuclear Operations' organization has changed as described in Section 17.2.17 and Figure 17.2-2.
 - c. The Manager Nuclear Plant Engineering's organization has changed as shown on Figure 17.2-2.
2. Changes Resulting from NRC Review of Attachment to KMLNRC 84-004.
 - a. Section 17.2.17.1 - regulations was changed to Regulatory Guides.
 - b. Table 17.2-1 - Wolf Creek Project Policy Manual description was clarified and the Nuclear Department General Procedures description was added.
3. Table 17.2-1a

The KG&E Procedures Manual description was modified to clarify procedures approval authority.

KG&E believes that the above additional changes do not reduce commitments in the Operating Quality Program previously accepted by the NRC.
