Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: LaSalle County Station Units 1 and 2
Updated FSAR (UFSAR)
NRC Docket Nos. 50-373 and 50-374

Reference (a): December 15, 1980 letter from D. G.
Eisenhut to All Licensees.

Dear Mr. Denton:

In accordance with the requirements of 10 CFR 50.71(e), Commonwealth Edison hereby submits the Updated FSAR for our LaSalle County Station. Units 1 and 2 have a common FSAR and, therefore, this update contains Unit 1 and Unit 2 information.

The information for Unit 1 has been prepared utilizing the guidance provided in the Federal Register Notice of May 9, 1980, and in Reference (a). Consistent with that guidance, the updated FSAR has been prepared in the same format as the original FSAR. The level of detail is the same as originally provided. The information provided for Unit 2 is current through Amendment 64. The official Unit 2 update per 10 CFR 50.71(e) is expected to be submitted as part of the April, 1985 update and, therefore, all future submittals will address both units.

Sections of the FSAR which were necessary for the Operating License application but do not relate to operational phase activities such as personnel resumes, NSSS Vendor and AE Quality Assurance Program descriptions, selected appendices, and technical specifications have not been included in the UFSAR. All original material is readily available in the FSAR, and has been referenced in the UFSAR as appropriate. Other self-standing documents that are revised on a frequent basis, such as the Emergency Plan, Security Plan, and Q.A. Topical Report are readily available at the licensee facilities and have not been included in the UFSAR, except as referenced.

Commonwealth Edison and its contractors have made every effort to identify all relevant information for inclusion in this first update, including all modifications to the facility as described in the FSAR that have been made since the issuance of the Unit 1 License NPF-11. In our judgment, the updated FSAR accurately reflects the as-built condition of Unit 1 as of a maximum of six months prior to this date.

In accordance with the regulations, future updates to the FSAR will be provided on an annual basis.

To the best of my knowledge and belief, the statements contained in the updated FSAR's are true and correct. In some respects these statements are not based on my personal knowledge but upon information furnished by other Commonwealth Edison employees. Such information has been reviewed in accordance with Company practice and I believe it to be reliable.

In accordance with the requirements of 10 CFR 50.71(e), twelve (12) copies of the UFSAR are provided.

One (1) signed original and twelve (12) copies of this letter are provided for your use.

Very truly yours,

C. Reed
