Joseph M. Farley Nuclear Plant  
RTD Bypass Elimination Licensing Report

Gentlemen:

During a telephone conference call on February 10, 1992 the NRC requested that Westinghouse Electric Corporation amend its request for withholding proprietary information (refer to Westinghouse letter CAW-91-118 dated January 23, 1991) in order to allow disclosure of the information on Table 2.1-1 of WCAP-12613, Revision 2, "RTD Bypass Elimination Licensing Report for J. M. Farley Nuclear Plant Units 1 and 2." (This WCAP was provided to the NRC by Alabama Power Company letter dated January 31, 1991 and referenced in the Alabama Power Company VANTAGE-5 fuel licensing submittal dated July 15, 1991.) Westinghouse has reviewed the NRC request and concluded that Table 2.1-1 can be released to the public without any significant harm to the Westinghouse competitive advantage in safety analysis methodology. As such, proprietary (WCAP-12613, Revision 2) and non-proprietary (WCAP-12614, Revision 2) versions of Table 2.1-1 are provided for your use along with the Westinghouse letter authorizing release to the public.

If you have any questions, please advise.

Respectfully submitted,

J. L. Woodard
