Effluent and Waste Disposal Semiannual Report
for July 1, 1991 through December 31, 1991

In accordance with the Monticello Technical Specifications, Appendix A to Operating License DPR-22, we are submitting the Effluent and Waste Disposal Semiannual Report covering the last half year of 1991.

Analysis for isotopes Sr-89, Sr-90 and Fe-55 for the fourth quarter were not completed in time to be included with this report. The analysis results are not expected to significantly change the computed off-site doses, and will be included with the next semiannual report.

Section 4.0 of the Process Control Program (PCP) Manual was revised and is included with this report.

The Off-site Dose Calculation Manual (ODCM) is not attached since it remained unchanged during the reporting period.

Fred L. Fey, Jr., Manager
Nuclear Radiological Services
