February 24, 1992

U.S. Nuclear Regulatory Commission  
ATTN: Document Control Desk  
Washington, DC 20555

Reference: Oregon State University TRIGA Reactor (OSTR),  
License No. R-106, Docket No. 50-243; USNRC Regulation  
10 CFR 50.64(c)(2)

Subject: Proposal submitted in response to the Commission's regulations requiring  
conversion of the OSTR from high enriched uranium (HEU) fuel to low  
enriched uranium (LEU) fuel

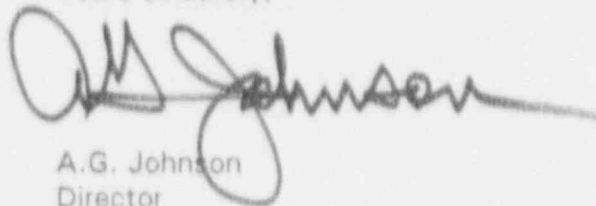

Gentlemen:

In accordance with the Commission's regulations contained in 10 CFR 50.64(c)(2), Oregon State University (OSU) hereby submits a proposal describing our current efforts relative to converting the OSTR from HEU fuel to LEU fuel. As stated in the attached letter from the U.S. Department of Energy, dated February 19, 1992, Oregon State University has been informed that Federal Government funding to begin the subject conversion is available during fiscal year 1992. However, the funding is contingent upon OSU's submission of a proposal to the USDOE and their subsequent approval of the proposal. Therefore, at the present time, we are unable to certify that we have Federal Government funding to initiate the conversion process.

As a result of the current notification from the Department of Energy, OSU intends to submit a proposal to the USDOE requesting funds to undertake the fuel conversion effort. When the proposal is funded, as we assume it will be, it is our intention to submit to the NRC a proposed conversion schedule and other necessary information relating to the conversion project, as required by 10 CFR 50.64(c).

If there are questions regarding our current activities under the Commission's regulations in 10 CFR 50.64, please let me know.

Yours sincerely,

  
A.G. Johnson  
Director

Dr. Arthur Johnson  
Radiation Center  
Oregon State University  
Corvallis, Oregon 97331

Dear Dr. Johnson:

This letter is to inform you that funding is available during FY-92 through the U.S. Department of Energy to initiate the conversion of your reactor from H<sub>2</sub>O to LEU fuel. It is requested, therefore, that you submit a proposal, including a detailed cost estimate, to accomplish the safety analysis phase of the conversion. The proposal should not include the costs for the new fuel, spent fuel cask rental, or fuel shipping transportation since these tasks are being handled by others.

You are also reminded that technical assistance for safety documentation review and analysis is available through the RERTR program at the Argonne National Laboratory. Your proposal should be coordinated with and reflect the degree of support to be provided by RERTR/ANL.

We would like to receive your proposal by May 1, 1992. Please direct it to:

Dr. Larry L. Barker  
Program Manager  
Office of University and Science Education Programs  
Office of Energy Research  
ER-82, Room 3F-061  
U.S. Department of Energy  
1000 Independence Avenue, SW  
Washington, D.C. 20585

If you have any questions please call Keith Brown on (202) 586-3904.

Sincerely,

Richard E. Stephens  
Associate Director  
Office of University and Science Education  
Programs  
Office of Energy Research
