QUARTERLY REPORT
JULY 1984 THROUGH SEPTEMBER 1984

1. Continue status assessment for all disciplines in the modules released and obtain release of additional modules.
2. Continue installation of non-Q civil, electrical, mechanical, instrumentation, and other work items throughout the plant on Unit 2 and nondeferred startup systems and areas.
3. Start work on Q work items following completion of Phase I activities of the Construction Completion Plan in support of startup systems and test milestones.
4. Continue underpinning work activities for the auxiliary, service water, and circulating water buildings under the direction of the Field Soils Organization.
5. Subcontractor B&W to continue installation of the NSSS systems in support of the Test Milestone 2B (auxiliary flush).
6. Continue work on installation of HVAC on Unit 2, common, and Unit 1 nondeferred systems by Zack, subcontractor.
7. Continue work on turned over startup systems in the plant in support of test milestones under the direction of General Services Organization.

MONTH/YEAR		COMPANY/ADDRESS	YOUR TITLE	DUTIES
FROM	TO			
July 1971	Oct. 1972	National Reactor Testing Station, Idaho Falls, Idaho	Project Engineer	Engineering Division Project manager for Power Burst Facility (PBF) modifications.
Jan. 1971	July 1971	National Reactor Testing Station, Idaho Falls, Idaho	Mechanical Design, Section Supervisor	Responsible for the mechanical eng. design section at the test reactor area. Plant engineering included all phases of support for both reactor primary and secondary systems. Reviewed incident reports for recommendation of engineering action.
March 1970	Jan. 1971	National Reactor Testing Station Idaho Falls, Idaho	Project Manager for Experimental Systems.	Prime responsibility was to insure that engineering division work for the sponsors (KAPL, BABL, and Battelle Northwest) was completed satisfactorily. Engineering services to the sponsors includes thermal & stress analysis, mech. & elec. design, metalurgical support & drafting.
Aug. 1969	March 1970	National Reactor Testing Station,	Design Eng. Section	Responsible for design work of Mechanical Engr. group. Plant Engineering support for the test reactors and the design of specialized handling tools to replace the eng. test reactor beryllium reflector.
May 1967	Aug. 1969	National Reactor Testing Station, Idaho Falls, Idaho	Design Eng.	Mechanical Design Eng. & Project Eng. for MTR beryllium change out. Responsible for designing required handling tools. Provide training to operating personnel in the use of the tools and procs. Responsible for general plant eng. & mech. design engineering mostly in support of the Advanced Test Reactor.

WRBird's Qualifications have been reviewed against Revision 0 of the Position Description for Manager - MPQAD. Based on that review WRBird has been found qualified to fill the position of Manager - MPQAD.

The determination is based on the following:

1. Walt holds a BS in Mechanical Engineering, an MS in Nuclear Science and is a Registered Professional Engineer.
2. Walt has sixteen years of experience working under Nuclear Quality Assurance Programs and has moved into positions of increasing importance. He has seven years experience in engineering relating to Nuclear Design/Construction Activities while working for EG&G. In addition he has five years experience managing shipboard maintenance and engineering functions.
3. Walt has demonstrated his ability to effectively supervise the activities or professional personnel and manage in a professional manner. In his various Management Position he has had many Engineers reporting to him. Walt continues to demonstrate his ability to effectively manage in his present position.

				*I did PT-II, MT-II, LT-II ^{up to 8"} AND RT-I INSP. AND HAVE ASSISTED IN UT EXAMINATIONS. I WORKED CLOSELY WITH THE BOCHTEL QC/QA DEPT. IN DOING THICKNESS CHECKS, WELDER VERIFICATIONS, FIT-UPS, NCRs AND PROPER NDE METHODS TO BE USED. I ALSO VISUALLY MADE SURE THAT THE COMPONENT OR PIPE WAS ABLE TO BE TESTED. I VISUALLY EXAMINED THE WELDS/B.M FOR SPATTER, V.C., CRACKS AND
				CLEANLINESS. I did CALIBRATIONS OF MT MACHINES AND ASSISTED IN CALIBRATION OF UT MACHINES. I ALSO HAVE DONE RELIEVING, STORAGE AND HELPED SET-UP SPECS ON NDE CHEMICALS.

11. I AFFIRM THAT THE ABOVE INFORMATION IS ACCURATE TO THE BEST OF MY KNOWLEDGE.
