Subject: Braidwood Station Units 1 & 2
Integrated Leak Rate Testing Schedule
NRC Docket Nos. 50-456/457

References: (a) May 31, 1991 A. R. Checca letter to Dr. T. E. Murley
(b) February 14, 1992 T. W. Simpkin letter to Dr. T. E. Murley

Dear Dr. Murley:

Reference (a) transmitted the Braidwood Unit 1 Integrated Leak Rate (ILRT) Report for the test conducted between February 2 and March 5, 1991. This test was initially reported as an as-found success and later determined to be an as-found failure. Reference (b) provided the Braidwood Unit 2 ILRT Report for the test conducted between September 12 and November 16, 1991. This test was reported as an as-found failure. Pursuant to 10CFR 50, Appendix J, Section III.A.6, Commonwealth Edison is submitting for NRC approval the testing schedule for the next ILRT on each unit.

The Unit 1 test will be conducted during the fourth refueling outage, presently scheduled to commence in March, 1994. The next Unit 2 test will be accomplished during the fourth refueling outage, presently scheduled to begin in September, 1994.

Please advise this office of the acceptability of these schedules. Additionally, please direct any questions you may have regarding this matter to this office.

Very truly yours,

Terrence W. Simpkin
T. W. Simpkin
Nuclear Licensing Administrator
