Subject: Virgil C. Summer Nuclear Station
Docket No. 50/395
Operating License No. NPF-12
Remittance of Application Fee for
Technical Specification Change

Dear Mr. Denton:

On June 20, 1984, South Carolina Electric and Gas Company (SCE&G) filed an application with the Nuclear Regulatory Commission (NRC) to amend the Reactor Coolant System Flow Section of the Virgil C. Summer Nuclear Station Technical Specifications. By a letter from the NRC dated July 2, 1984, SCE&G was informed that this application was subject to the licensing fee provisions of the revised 10CFR170 rule since the application was filed on the effective date of the revised rule. Our check in the amount of four thousand dollars (\$4000.00) was returned with the July 2, 1984 letter.

In response to the NRC letter dated July 2, 1984, please find enclosed a check in the amount of one hundred fifty dollars (\$150.00) to serve as the application fee for the Reactor Coolant System Flow Technical Specification change submitted by SCE&G on June 20, 1984. It is our understanding that in accordance with the recent revision to 10CFR170, SCE&G will be assessed in the future for the regulatory review required to process this change.

If you have any further questions, please advise.

Very truly yours,

O. W. Dixon, Jr.
