

SOUTH CAROLINA ELECTRIC & GAS COMPANY

POST OFFICE 764

COLUMBIA, SOUTH CAROLINA 29218

O. W. DIXON, JR.
VICE PRESIDENT
NUCLEAR OPERATIONS

July 19, 1984

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Virgil C. Summer Nuclear Station
Docket No. 50/395
Operating License No. NPF-12
Revision of Technical
Specification 6.3

Dear Mr. Denton:

South Carolina Electric and Gas Company (SCE&G) requests a revision to the Virgil C. Summer Nuclear Station Technical Specification 6.3, Subsection 6.3.1, "Unit Staff Qualifications." The change is intended to clarify the educational requirements of candidates for Senior Reactor Operator's Licenses. The revision, as shown on the attached marked-up Technical Specification page, consists of a reference to NUREG 0737, "Clarification of TMI Action Plan Requirements," Section I.A.2.1 and NUREG 1021, "Operator Licensing Examiner Standards," ES-109D.

SCE&G has determined that a finding of no significant hazards consideration is appropriate because the proposed revision is considered to be clarifying, administrative in nature and consistent with Nuclear Regulatory Commission guidance.

The revision has been reviewed and approved by the Plant Safety Review Committee and the Nuclear Safety Review Committee. The statements and matters set forth herein are true and correct to the best of my knowledge and belief. As required by Title 10 of the Code of Federal Regulations, Part 170 (10CFR170), a check in the amount of One Hundred Fifty Dollars (\$150.00) is enclosed. It is our understanding that in accordance with the recent revision to 10CFR170, SCE&G will be assessed in the future for the regulatory review required to process this change.
