Docket No. 50-425

U. S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, D. C. 20555

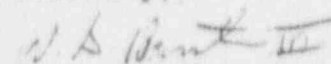

Gentlemen:

VOGTLE ELECTRIC GENERATING PLANT
DETAILED CONTROL ROOM DESIGN REVIEW

This letter confirms our conversation of March 4, 1992, with Mr. Darl Hood of the USNRC. In this conversation, Georgia Power Company (GPC) indicated that all Detailed Control Room Design Review (CRDR) open items were completed for Vogtle Electric Generating Plant (VEGP) - Unit 1 during the last outage which ended in November, 1991. Also, GPC stated that all remaining CRDR items for VEGP - Unit 2 will be completed by the end of the second refueling outage which began on March 9, 1992. The only remaining item on Unit 2 is the HED on instrument striping.

If you should require any additional information, please contact this office.

Sincerely,

W. G. Hairston, III
