RE: Revision to the Physical Security Plan for the Penn State Breazeale Reactor, License No. R-2,
Docket No. 50-05

Dear Sir or Madame:

Revisions are hereby proposed for the Pennsylvania State University Breazeale Reactor (PSBR) Physical Security Plan. One item has been changed at the facility so the security plan needs to be updated. The security plan will be updated by replacing page 1-1 with the one included with this letter. A physical description of this change follows. The change does not reduce the security of the protected areas.

The change is in Section 1.1.1 first paragraph on page 1-1. The item that has been altered is item number 2 in figure 2 a glazed plexiglass window. The plexiglass window was replaced by a tempered glass window. The tempered glass is as resistant to penetration as the plexiglass that is being replaced. We consider this to be a minor change under 10 CFR 50.54 (p) so prior approval was not required. Note, that the attachment contains information withheld from public disclosure pursuant to 10 CFR 2.790 (d)

An exemption of fees for this licensing action is requested under the provisions of 10 CFR 170.11 (a) (4). If you have any questions on this matter, please refer them directly to Marcus H. Voth at (814) 865-6351.

Sincerely,

David A. Shirley
Senior Vice President for Research
and Dean of the Graduate School
