Re: The Midland Nuclear Plant

Dear Mr. Dircks:

I read with interest the description of the meeting held on April ²⁵~~27~~, 1984 between Consumers Power Company and the N.R.C. and understand that at that meeting intervenors, GAP, Lone Tree Council, Mary Sinclair and representatives of Barbara Stemaris were present and allowed to express their continued opposition to this project. We further understand that some spoke as representing the Midland community.

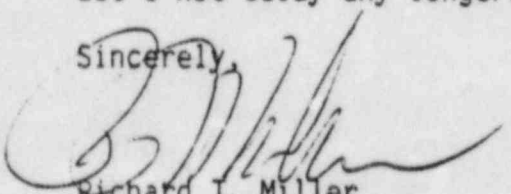

This group of individuals do not represent any accountable amount of our community. In my profession as a Realtor and in the many activities I am involved with, there are only a few who are concerned with the plant being built. And they are not opposed to it.

Support for the plant here is numerous. We do not want to cloud your meetings with great numbers of people. In one afternoon we could do just that. We believe that the Nuclear Regulatory Commission knows that we want it built.

We do not want to bough you down with people. You folks are well versed in your jobs and we hope you will do them well and soon. We feel the concerns of these individuals in the past, have been corrected are in the process of being corrected.

Let's not delay any longer. Let's get it done.

Sincerely,

Richard T. Miller
