Gentlemen:

In accordance with 10CFR2.201, Entergy Operations, Inc. hereby submits in Attachment 1 the responses to the violations identified in Appendix A of Inspection Report (IR) 91-01, dated April 5, 1991. As requested in Inspection Report (IR) 91-08, dated April 5, 1991, Entergy's response to the issue raised in Paragraph 2.b has been included as part of our response to violation 9101-02.

Please note that during a May 6, 1991, telecon between Waterford 3 and NRC Region IV representatives, Messrs. L.E. Yandell and C.L. Cain, a 7 day extension for this response was granted until May 13, 1991.

In IR 91-01, the NRC expressed concern regarding the appearance of an overall decline in the Waterford 3 Physical Security Program since the last inspection. Entergy would like to assure the NRC that we intend to maintain Waterford 3's Physical Security Program at the same high level of performance that the NRC has come to recognize in past years. An example of Waterford 3's efforts to excel in the area of plant security is the implementation of a massive assessment aids system upgrade which involved extensive modifications to existing systems, the procurement of new components and equipment, and significant engineering, installation, and testing.

The material enclosed herein contains Safeguards Information as defined in 10 CFR 73.21 and its disclosure to unauthorized individuals is prohibited by Section 147 of the Atomic Energy Act of 1954, as amended. We kindly request that it be withheld from public disclosure.
