Perry Nuclear Power Plant
Docket No. 50-440
Seismic Event Special Report
Perry Technical Specification 4.3.7.2.2

Gentlemen:

Enclosed for your information is a copy of a non-periodic Seismic Event Evaluation Special Report submitted pursuant to Perry Nuclear Power Plant (PNPP) Technical Specification 4.3.7.2.2. This Specification requires that a Special Report be prepared and submitted to the Commission within 10 days following a seismic event with recorded motion equal to or above .05g, with plant strong motion instrumentation. On 03/15/92 a small earthquake located four (4) miles Northwest of PNPP was recorded by PNPP strong motion instrumentation with accelerations above this threshold, but below the Operating Basis Earthquake (OBE). Accordingly, the enclosed Special Report, "Seismic Event Evaluation" was prepared.

Should you have any questions, please call.

Sincerely,

M. D. Lyster
