Mr D K Davis, Acting Chief
Operating Reactors Branch No. 2
Division of Operating Reactors
c/o Distribution Services Branch, DDC, ADM
U S Nuclear Regulatory Commission
Washington, D C 20555

Dear Mr Davis:

MONTICELLO NUCLEAR GENERATING PLANT
Docket No. 50-263 License No. DPR-22

Corrected Information on
Reactor Vessel Material Surveillance Program

Our letter to you dated August 3, 1977 provided you with a revised report describing the General Electric BWR Reactor Vessel Material Surveillance Program. Page 3 of this report contained a typographical error. The second sentence of the second paragraph on page 3 should be corrected to read:

The shielded metal arc welds, electroslog welds, and submerged metal arc welds made without copper coated electrodes would exhibit approximately a 10 to 15 °F variation in transition temperature response due to residual element composition at the maximum 1/4T end-of-life fluence expected for BWR/2, 3 and 4 plants.

Please make this revision to all copies of our August 3, 1977 report.

Yours very truly,

L O Mayer, PE
Manager of Nuclear Support Services
